V. CERTIFICATION:

I certify that (check items completed):

☑ Remedial measures were performed at each outlet where an elevated level of lead was found.

☐ For outlets that were not permanently disconnected or removed from service as means of remediation: After remediation, a follow-up first-draw sample (flushed sample for any outlet for which automated flushing was the means of remediation) was collected from each outlet where an elevated level of lead was found.

☐ Outlets were only put back into service if no elevated levels of lead were found in the follow-up first-draw samples (flushed samples if automated flushing was the means of remediation).
